

At home or away, know you're protected with a Honeywell backup generator.

Take a glance around your home and you'll see a thousand reasons to protect what you've worked for: treasured photographs, a piece of furniture passed through generations, and most important, those who matter most to you. You've earned the lifestyle you lead, and now the name you've trusted in your home for decades will help you keep everything running in the event of a power outage. Power loss is more than an inconvenience—it can quickly affect the safety and security of your family and your possessions. Honeywell generators will help you protect what matters most.

Automatic Backup Generators

Honeywell

Protect what matters most.

What do you need to keep running?

Well pump, heating and cooling, home office equipment, refrigeration & other appliances.

You're already at home with Honeywell.

Take a look around your home and you'll likely see the Honeywell brand name on the controls for your heating and air conditioning, home security and indoor air quality systems. That's because Honeywell is one of the leading

providers of home automation products. Trust a Honeywell generator to keep your lifestyle running when you're home, and to help protect your investments when you're away.

A Honeywell backup generator takes care

Reliable electricity is easy to take for granted—at the touch of switch it's almost always there. And while weather-related outages make news across the country, demand on an aging power grid is making brownouts an all too common occurrence. Your home relies on power more than ever before to run your refrigeration, lights,

well pump, sump pump, appliances, home offices, entertainment systems and more. Trust a Honeywell automatic backup generator to protect what matters most during a power outage, whether you're home or away.

It fuels automatically.

A permanently installed backup generator is fueled automatically, much like your furnace or other natural-gas or liquid propane powered appliances. The generator is connected to your existing fuel supply to deliver clean, worry-free power. If you're away from home when the power goes out, you won't have to worry about a thing.

There's a full range of automatic standby generators sized for every home and need. Even portable products for power on the go. See the full line at HoneywellGenerators.com

- Thermostats
- Air Purification
- Central Vacuums
- Door Chimes
- Furnace Filters

e of your family and home — automatically.

It starts and stops automatically.

Just like your heating and cooling system is controlled by a thermostat, a Honeywell generator is controlled by a transfer switch that senses when utility power fails, starting the generator automatically within seconds. When

utility power resumes, your Honeywell generator shuts itself down and automatically switches back to utility power. It even “exercises” itself automatically once a week, starting and stopping to ensure it’s ready for the next power outage.

Premium features are standard on Honeywell backup generators.

Mobile Link™ Remote Monitoring:
Every Honeywell backup generator comes complete with Mobile Link™, our new wireless remote monitoring system that lets you check on your generator’s status and receive timely notifications when something is needed using your computer, tablet or smartphone.

Aluminum Enclosure:
Also standard is a sturdy aluminum enclosure that resists corrosion for long life, even in salt-air, coastal climates.

Sync™ 2.0 Transfer Switch:
The Sync™ 2.0 transfer switch is also included, to provide more backup power through smart load management.

Comprehensive 5-YEAR Warranty:
One of the best available, ensuring your peace of mind.

Contact a dealer to discover the best system for you.

Your Honeywell generator dealer handles selection, installation, and service. Easy.

Your dealer will help you size a Honeywell generator system to provide the correct amount of coverage you need and discuss the installation process.

Just like your HVAC system, keeping your Honeywell backup generator running at peak performance is as easy as selecting a routine maintenance program with your Honeywell generator dealer. Factory-trained technicians take care of everything on a scheduled basis. Visit HoneywellGenerators.com to learn more.
